

Steel Strips Wheel Limited

Information Security Policy

The confidentiality, integrity, and availability of information, in all its forms, are critical to the ongoing functioning and good governance of SSWL. Failure to identify information security risks, failure to adequately secure information increases the risk of financial losses and severe reputational losses which may be business threatening also.

To support this strategy, we have implemented an information security management system (ISMS) based on ISO/IEC 27001:2013. The ISMS details SSWL direction and commitment to the security of information.

Sandeep Sharma
